

Bellevue Church of Christ

Bellevue, Tennessee

A complex expansion and renovation of their existing building, the Bellevue Church of Christ project was further complicated by the congregation's desire to maintain ongoing activities at the church during construction.

The completed church complex added a 1200-seat sanctuary and numerous classrooms and meeting areas. Carden's crews successfully blended the new with the old in a structure that features multiple accesses, cut-stone window trim and a 50-foot steeple.
