

Tennessee Society of CPAs Brentwood, Tennessee

The headquarters for the Tennessee Society of Certified Public Accountants is in Maryland Farms and was originally built by Carden Company. When they wanted to expand their space and upgrade the technology for their conference and training rooms, they came back to the company that had provided the original quality structure. But this time they wanted to keep their 20 full-time employees on site during the renovation.

“We knew Carden Company had done such a great job in building it and was familiar with the structure - but they still exceeded our expectations. If you came in today, you’d have no idea it was an add-on there.” - Director Brad Floyd
