

W. W. Grainger, Inc.
Nashville, Tennessee

When W. W. Grainger, Inc., wanted to add an additional branch location to the Nashville market, they needed a flexible space to accommodate both an attractive display/office area and the tracking/storage systems required for their inventory.

Carden Company accomplished this on a design/build basis, collaborating with Butler Manufacturing. Utilizing Butler's widespan structure and MR-24 roof system, we were able to provide W. W. Grainger with a durable, low-maintenance building designed specifically to their needs.
