A. Z. Kelley Elementary School
Antioch, Tennessee

For the construction of the A. Z. Kelley Elementary School in Antioch, a few extra weeks to finish things up was not an option – the first day of school is *not* a flexible deadline.

But despite a delayed start due to difficult site conditions, Carden Company made it possible for the doors of the new school to open right on time.

Though the A. Z. Kelley job was awarded in July, Carden Company couldn't begin work until October, due to a rock site that slowed down construction of the building pad. But the deadline for completion was still mid-August the following year.

Complete with classrooms, offices and gymnasium, the school was a very large project to complete in just nine months. It was the kind of construction job that required aggressive time management.

As with any project on such a tight schedule, ordinary problems can pose special challenges. Quick reactions to difficulties or change orders required the efficient cooperation of suppliers, sub-contractors – and the Metropolitan School Board.

The final product was a spacious new school for a growing community. It was a challenging project for all concerned, but Bob Heffington, who oversees construction of Metro schools, said the relationship with Carden Company was a positive one and was happy with their work.

When your project is challenging, call Carden. Carden Company delivers innovative solutions, impressive quality and exceptional service.
