

## **Brentwood Country Club**

Brentwood, Tennessee

The Brentwood County Club needed an expansion and renovation of the antebellum home that serves as their clubhouse in order to upgrade their pro shop, men's and women's locker rooms, men's grill, a dining room and kitchen facilities.

The challenges of the project called for close coordination between Carden Company, the owners, the architect and subcontractors. In particular, the age and style of the original building required expert blending of the old and new sections. And to make managing the work site a little trickier, the country club stayed in full operation during the construction process.
